

Order Codes for REG-SYS Cases

A.Eberle have simplified their order codes structure for the REGSYS range. The enclosure is now specified separately rather than being specified in one of the plug-in module strings. You now specify the enclosure, what modules and blanking plates are fitted where, if wiring for future modules is required, and then the various modules that go in the enclosure.

You don't need to worry about the detail as we will take care of that – but be aware the order codes will look slightly different as we move to specifying products in this improved manner.

There are some changes to case order codes that you may have been familiar with:

- B05 enclosure is now B32 (Panel mount, 192 mm wide)
- B06 enclosure is now B42 (Panel mount, 288 mm wide)
- B03 short enclosure is now B30 (Wall mount, 215 mm wide)
- B03 Long enclosure is now B31 (Wall mount, 215 mm wide)
- B07 short enclosure is now B40 (Wall mount, 310 mm wide)
- B07 Long enclosure is now B41 (Wall mount, 310 mm wide)
- B92 is unchanged (Rack mount, 19 inch)
- B93 is unchanged (Rack mount, 19 inch with Phoenix terminals)
